Enable Wireless Option:
The Wireless Option can only be enabled by a Kaba Certified Access Control Dealer/Integrator.

1. Once Enterprise Software is installed, go to System Setup and choose System Settings. In the Wireless Configuration section, “check” Enable Online Communications.

2. The software requires a Kaba Wireless Certified Dealer ID and Kaba Wireless License Number to be entered.

3. For Emergency Passage or Lockdown to be enabled and functional at least one box must be selected for each command in the Wireless Setup screen.

4. Select the On Line ZigBee Network menu and choose Discover Device or select the Discover Device icon located next to the Help icon. The E-Plex (ZigBee) Gateway should be connected to the host PC’s USB port.

5. Configure the ZigBee Gateway

6. Use the ZAC (ZigBee Access Code) Process to Configure a Wireless E-Plex Lock

Click Next for the Gateway and Router Configuration Wizard.
11. Maintenance and Diagnostics of Wireless E-Plex Locks

For detailed information on all of these wireless features and functions, click on Help, then Software User Guide.
